630-845-4500  
www.ftek.com

(Address and telephone number of principal executive offices)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Common Stock	FTEK	NASDAQ

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	<input type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input checked="" type="checkbox"/>	Smaller reporting company	<input checked="" type="checkbox"/>
		Emerging growth company	<input type="checkbox"/>

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes  No

On April 30, 2026 there were outstanding 31,165,249 shares of Common Stock, par value \$0.01 per share, of the registrant.

**FUEL TECH, INC.**  
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
March 31, 2026  
(Unaudited)  
(in thousands, except share and per-share data)

**1. General**

**Organization**

Fuel Tech, Inc. and subsidiaries ("Fuel Tech", the "Company", "we", "us" or "our") develops and provides proprietary technologies for air pollution control, process optimization, water treatment, and advanced engineering services. These technologies enable customers to operate in a cost-effective and environmentally sustainable manner.

The Company's nitrogen oxide (NOx) reduction technologies reduce nitrogen oxide emissions from boilers, furnaces, and other stationary combustion sources. To reduce NOx emissions, our technologies utilize advanced combustion modification techniques and post-combustion NOx control approaches including non-catalytic, catalytic, and combined systems. The Company also provides solutions for the mitigation of particulate matter, including particulate control with electrostatic precipitator products and services, and using flue gas conditioning systems which modify the ash properties of particulate for improved collection efficiency. The Company's FUEL CHEM® technology improves the efficiency, reliability, fuel flexibility, boiler heat rate, and environmental status of combustion units by controlling slagging, fouling, corrosion, and opacity. Water treatment technologies include DGI® Dissolved Gas Infusion Systems which utilize a patented gas-infusing saturator vessel and a patent-pending channel injector to deliver supersaturated oxygen-water solutions and potentially other gas-liquid combinations to target process applications or environmental issues within the municipal and industrial water sectors. The infusion process has a variety of potential applications in the water and wastewater treatment sector, including aquaculture, agriculture/horticulture, pulp & paper, tanneries, landfill leachate, irrigation, treatment of natural waters, wastewater odor management as well as supplying oxygen or other gases for biochemical reactions and pH adjustment.

Many of Fuel Tech's products and services rely heavily on the Company's computational fluid dynamics modeling capabilities, which are enhanced by internally developed, high-end visualization software.

**Basis of Presentation**

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X of the Exchange Act. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete financial statements. In the opinion of management, the financial statements reflect all adjustments (consisting of normal recurring accruals) considered necessary for the fair statement of Fuel Tech's financial position, cash flows, and results of operations for the periods presented. All significant intercompany transactions and balances have been eliminated. The results of operations for the three months ended March 31, 2026 are not necessarily indicative of the results to be expected for the full year ending December 31, 2026. For further information, refer to the audited consolidated financial statements and footnotes thereto included in Fuel Tech's Annual Report on Form 10-K for the year ended December 31, 2025 as filed with the Securities and Exchange Commission.

**2. Summary of Significant Accounting Policies**

**Investments**

The Company's investment policy provides for \$20,000 in funds at BMO Harris Bank, N.A. (BMO Harris) to be invested in debt securities. The funds are held in money market funds until they are invested in those securities. A portion of the funds invested are restricted as collateral under the Investment Collateral Security agreement (see Note 10). At March 31, 2026, the amount of funds collateralized under the Investment Collateral Security agreement is \$2,798 relating to existing standby letters of credit that is comprised of \$2,746 with varying maturity dates that expire no later than March 31, 2027 and \$52 with a latest maturity date of October 8, 2028.

We consider all highly liquid debt investments with original maturities from the date of purchase of three months or less as cash equivalents. Cash equivalents include investments in money market funds. Carrying value of cash equivalents approximates fair value due to the maturities of three months or less.

[Table of Contents](#)

Our investments in debt securities consist of United States (US) Treasury securities, including Notes, Bonds, and Bills, and US Government Agency securities, which are designated as held-to-maturity (HTM) and stated at amortized cost. The Company has the positive intent and ability to hold these investments to maturity and does not expect to sell any debt securities before maturity to settle an obligation under the Investment Collateral Security agreement. The original maturities of our HTM investments range from three to thirty-six months. HTM debt investments with original maturities of approximately three months or less from the date of purchase are classified within cash and cash equivalents. HTM debt investments with original maturities at the date of purchase greater than approximately three months and remaining maturities of less than one year are classified as short-term investments. HTM debt investments with remaining maturities beyond one year are classified as long-term investments. Interest income, including amortization of premium and accretion of discount, is included on the Condensed Consolidated Statements of Operations in Interest income under the effective yield method. Accrued interest is included in Prepaid expenses and other current assets on the Condensed Consolidated Balance Sheets. Due to the creditworthiness of the entities issuing these securities, there is no impairment recorded related to the unrealized losses.

The following table provides the amortized cost, gross unrealized gains and losses, and fair value of our HTM debt securities:

	As of	
	March 31, 2026	December 31, 2025
Held-to-maturity debt securities:		
Amortized cost	\$ 21,465	\$ 19,933
Gross unrecognized gains	24	76
Gross unrecognized losses	(11)	—
Fair value	\$ 21,478	\$ 20,009

The following table provides the amortized cost and fair value of debt securities by maturities at March 31, 2026:

	Amortized Cost	Fair Value
Within one year	\$ 12,470	\$ 12,483
After one year through two years	8,995	8,995
Total	\$ 21,465	\$ 21,478

**Inventories**

Inventories consist primarily of equipment constructed for resale and spare parts and are stated at the lower of cost or net realizable value, using the weighted-average cost method. At March 31, 2026 and December 31, 2025, inventory included equipment constructed for resale of \$176 and spare parts, net of reserves, of \$188 and \$197, respectively. Usage is recorded in cost of sales in the period that parts were issued to a project, used to service equipment, or sold to customers. Equipment constructed for resale that is in process is recorded in Other assets. In process equipment for inventory recorded as Other assets was \$52 and \$53 as of March 31, 2026 and December 31, 2025, respectively. Inventories are periodically evaluated to identify obsolete or otherwise impaired parts and are written off when management determines usage is not probable. The Company estimates the balance of excess and obsolete inventory by analyzing inventory by age using the last used and original purchase dates and existing sales pipeline for which the inventory could be used.

**Allowance for Credit Losses**

The Company accounts for expected credit losses under Financial Accounting Standards Board (FASB) Accounting Standards Update (ASU) ASU 2019-10, Financial Instruments - Credit Losses (Topic 326), Derivatives and Hedging (Topic 815), and Leases (Topic 842). This guidance requires the measurement of all expected losses based on historical experience, current conditions and reasonable and supportable forecasts. For trade receivables and other financial instruments, we are required to use a forward-looking expected loss model rather than the incurred loss model for recognizing credit losses which reflects losses that are probable.

For the general risk categories, the Company uses historical losses over a fixed period, excluding certain write-off activity that was not considered a credit loss event, to determine the historical credit loss. Historical loss rates are then adjusted to consider current economic conditions and past, current, and future events and circumstances when determining expected credit losses. Investments in financial assets issued by US Government and Government Agency are considered as having zero expected credit losses and are excluded from the allowance for credit loss calculation.

The following table provides the roll forward of the allowance for credit losses:

At January 1, 2025	\$	106
Provision charged to expense		—
(Write-offs) / Recoveries		2
At December 31, 2025	\$	108
Provision charged to expense		—
(Write-offs) / Recoveries		(1)
At March 31, 2026	\$	107

### 3. Revenue

#### *Disaggregated Revenue by Product Technology*

The following table presents our revenues disaggregated by product technology:

	Three Months Ended March 31,	
	2026	2025
<b>Air Pollution Control</b>		
Technology solutions	\$ 755	\$ 571
Spare parts	394	251
Ancillary revenue	455	481
<b>Total Air Pollution Control technology revenues</b>	<b>1,604</b>	<b>1,303</b>
<b>FUEL CHEM</b>		
FUEL CHEM technology solutions	4,476	5,079
<b>Total Revenues</b>	<b>\$ 6,080</b>	<b>\$ 6,382</b>

#### *Disaggregated Revenue by Geography*

The following table presents our revenues disaggregated by geography, based on the location of the end-user:

	Three Months Ended March 31,	
	2026	2025
United States	\$ 5,247	\$ 5,359
<b>Foreign Revenues</b>		
Latin America	186	348
Europe	393	477
Africa	—	38
Asia	254	160
<b>Total Foreign Revenues</b>	<b>833</b>	<b>1,023</b>
<b>Total Revenues</b>	<b>\$ 6,080</b>	<b>\$ 6,382</b>

#### *Timing of Revenue Recognition*

The following table presents the timing of our revenue recognition:

	Three Months Ended March 31,	
	2026	2025
Products transferred at a point in time	\$ 5,325	\$ 5,811
Products and services transferred over time	755	571
<b>Total Revenues</b>	<b>\$ 6,080</b>	<b>\$ 6,382</b>

#### *Contract Balances*

The timing of revenue recognition, billings, and cash collections results in billed accounts receivable, unbilled receivables (contract assets), and customer advances and deposits (contract liabilities) on the Condensed Consolidated Balance Sheets. In our Air Pollution Control (APC) technology segment, amounts are billed as work progresses in accordance with agreed-upon contractual terms. Generally, billing occurs subsequent to revenue recognition, resulting in contract assets. These assets are reported on the Condensed Consolidated Balance Sheets on a contract-by-contract basis at the end of each reporting period. At March 31, 2026, December 31, 2025, and December 31, 2024, contract assets for APC technology projects were approximately \$974, \$887, and \$2,075, respectively, and are included in accounts receivable on the Condensed Consolidated Balance Sheets.

The Company will periodically bill in advance of costs incurred before revenue is recognized, resulting in contract liabilities. These liabilities are reported on the Condensed Consolidated Balance Sheets on a contract-by-contract basis at the end of each reporting period. Contract liabilities were \$1,066, \$1,026, and \$721 at March 31, 2026, December 31, 2025, and December 31, 2024, respectively, and are included in other accrued liabilities on the Condensed Consolidated Balance Sheets.

[Table of Contents](#)

Changes in the contract asset and liability balances during the three-month period ended March 31, 2026 were not materially impacted by any other items other than amounts billed and revenue recognized as described previously. Revenue recognized that was included in the contract liability balance at the beginning of the period was \$452 and \$372 for the three months ended March 31, 2026 and 2025, respectively.

As of March 31, 2026 and December 31, 2025, we had no construction contracts in progress that were identified as a loss contract.

*Remaining Performance Obligations*

Remaining performance obligations represents the transaction price of APC technology booked orders for which work has not been performed. As of March 31, 2026, the aggregate amount of the transaction price allocated to remaining performance obligations was \$6,923. The Company expects to recognize revenue on approximately \$6,000 of the remaining performance obligations over the next 12 months with the remaining recognized thereafter.

*Accounts Receivable*

The components of accounts receivable are as follows:

	As of	
	March 31, 2026	December 31, 2025
Trade receivables	\$ 3,156	\$ 4,494
Unbilled receivables	974	887
Other short-term receivables	89	82
Allowance for credit losses	(107)	(108)
<b>Total accounts receivable</b>	<b>\$ 4,112</b>	<b>\$ 5,355</b>

**4. Restructuring Activities**

On January 18, 2019, the Company announced a planned suspension of its APC business operation in China. This action was part of Fuel Tech's ongoing operational improvement initiatives designed to prioritize resource allocation, reduce costs, and drive profitability for the Company on a global basis. The transition associated with the suspension of the APC business which has taken place through March 31, 2026 includes staff rationalization and reduction, supplier and partner engagement, and the monetization of certain assets. The remaining transition activities include the execution of the activities to satisfy the requirements for the remaining APC projects in China (with a backlog totaling approximately \$3) and those related to subsidiary closure.

The following table presents our revenues and net loss for the three months ended March 31, 2026 and 2025 in China as follows:

	Three Months Ended March 31,	
	2026	2025
Total revenues	\$ —	\$ —
Net loss	(13)	(18)

The following table presents net assets in China as of March 31, 2026 and December 31, 2025:

	As of	
	March 31, 2026	December 31, 2025
Total assets	\$ 772	\$ 767
Total liabilities	92	83
<b>Total net assets</b>	<b>\$ 680</b>	<b>\$ 684</b>

Total assets primarily consist of cash and other receivables. Total liabilities consist of accounts payable and certain accrued liabilities.

**5. Accumulated Other Comprehensive Loss**

The changes in accumulated other comprehensive loss by component were as follows:

	Three Months Ended March 31,	
	2026	2025
<b>Foreign currency translation</b>		
Balance at beginning of period	\$ (1,718)	\$ (1,915)
Other comprehensive income (loss):		
Foreign currency translation adjustments (1)	(43)	135
<b>Total accumulated other comprehensive loss</b>	<b>\$ (1,761)</b>	<b>\$ (1,780)</b>

(1) In all periods presented, there were no tax impacts related to rate changes and no amounts were reclassified to earnings.

## 6. Treasury Stock

Common stock held in treasury totaled 1,233,052 and 1,206,741 with a cost of \$2,602 and \$2,568 at March 31, 2026 and December 31, 2025, respectively. These shares were withheld from employees to settle personal tax withholding obligations that arose as a result of restricted stock units that vested.

## 7. Earnings per Share

Basic earnings per share excludes the dilutive effects of stock options, restricted stock units (RSUs), warrants, and the nil coupon non-redeemable convertible unsecured loan notes. Diluted earnings per share includes the dilutive effect of the nil coupon non-redeemable convertible unsecured loan notes, RSUs, warrants, and unexercised in-the-money stock options, except in periods of net loss where the effect of these instruments is anti-dilutive. Out-of-the-money stock options and warrants are excluded from diluted earnings per share because they are unlikely to be exercised and would be anti-dilutive if they were exercised. For the three months ended March 31, 2026 and 2025, basic earnings per share is equal to diluted earnings per share because all outstanding stock awards, warrants, and convertible loan notes are considered anti-dilutive during periods of net loss.

The following table sets forth the weighted-average shares used in calculating the earnings per share for the three months ended March 31, 2026 and 2025:

	Three Months Ended March 31,	
	2026	2025
Basic weighted-average shares	31,091,335	30,718,000
Unexercised options and unvested RSUs	—	—
Diluted weighted-average shares	31,091,335	30,718,000

For the three months ended March 31, 2026 and 2025, Fuel Tech had weighted-average outstanding equity awards of 27,000 and 135,900, respectively, and warrants of 2,850,000 in both periods, which were antidilutive or represent out-of-the-money options for the purpose of the calculation of diluted earnings per share. For the three months ended March 31, 2026 and 2025, Fuel Tech had incremental equity awards of 159,300 and 322,700, respectively, that were excluded from the computation of diluted earnings per share as the inclusion of such would have been anti-dilutive due to a net loss in the period. These equity awards could potentially dilute basic earnings per share in future years.

## 8. Stock-Based Compensation

Fuel Tech's 2024 Long-Term Incentive Plan (2024 Plan) was adopted in June 2024 and replaced our prior incentive plan which was approved by our stockholders in 2014 (LTIP). No further grants will be made from the LTIP. The 2024 Plan and LTIP are referred to collectively as the Incentive Plans.

Under the Incentive Plans, awards may be granted to participants in the form of Non-Qualified Stock Options, Incentive Stock Options, Stock Appreciation Rights, Restricted Stock, RSUs, Performance Awards, Bonuses or other forms of share-based or non-share-based awards or combinations thereof. Participants in the Incentive Plans may be our directors, officers, employees, consultants, or advisors (except consultants or advisors in capital-raising transactions) as the directors determine are key to the success of our business. There are a maximum of 3,249,134 shares that may be issued or reserved for awards to participants under the Incentive Plans. As of March 31, 2026, Fuel Tech had 3,120,297 shares available for issuance under the Incentive Plans.

We did not record any excess tax benefits within income tax expense for the three months ended March 31, 2026 and 2025. Given the Company has a full valuation allowance on its deferred tax assets, there were no excess tax benefits to record for the three months ended March 31, 2026 and 2025. In addition, we account for forfeitures of awards based on an estimate of the number of awards expected to be forfeited and adjust the estimate when it is no longer probable that the employee will fulfill the service condition.

Stock-based compensation is included in selling, general, and administrative costs in our Condensed Consolidated Statements of Operations. The components of stock-based compensation for the three months ended March 31, 2026 and 2025 were as follows:

	Three Months Ended March 31,	
	2026	2025
Stock options and restricted stock units, net of forfeitures	\$ 56	\$ 110
After-tax effect of stock-based compensation	\$ 56	\$ 110

### Stock Options

Stock options granted to employees under the Incentive Plans have a 10-year life and they vest as follows: 50% after the second anniversary of the award date, 25% after the third anniversary, and the final 25% after the fourth anniversary of the award date. Fuel Tech calculates stock compensation expense for employee option awards based on the grant date fair value of the award, less expected annual forfeitures, and recognizes expense on a straight-line basis over the four-year service period of the award. Stock options granted to members of our Board of Directors vest immediately. Stock compensation for these awards is based on the grant date fair value of the award and is recognized in expense immediately.

Fuel Tech uses the Black-Scholes option pricing model to estimate the grant date fair value of employee stock options. The principal variable assumptions utilized in valuing options and the methodology for estimating such model inputs include: (1) risk-free interest rate – an estimate based on the yield of zero-coupon treasury securities with a maturity equal to the expected life of the option; (2) expected volatility – an estimate based on the historical volatility of Fuel Tech's Common Stock for a period equal to the expected life of the option; and (3) expected life of the option – an estimate based on historical experience including the effect of employee terminations.

Stock option activity for Fuel Tech’s Incentive Plans for the three months ended March 31, 2026 was as follows:

	Number of Options	Weighted- Average Exercise Price	Weighted- Average Remaining Contractual Term	Aggregate Intrinsic Value
Outstanding on January 1, 2026	71,000	\$ 1.20		
Granted	—	—		
Exercised	—	—		
Expired or forfeited	—	—		
Outstanding on March 31, 2026	71,000	\$ 1.20	1.10	\$ 11
Exercisable on March 31, 2026	71,000	\$ 1.20	1.10	\$ 11

As of March 31, 2026, there was no unrecognized compensation cost related to non-vested stock options granted under the Incentive Plans.

### Restricted Stock Units

RSUs granted to employees vest over time based on continued service (typically vesting over a period between two to four years), and RSUs granted to directors vest after a one year vesting period based on continued service. Such time-vested RSUs are valued at the date of grant based on the closing price of the Common Shares on the grant date. Compensation cost, adjusted for estimated forfeitures, is amortized on a straight-line basis over the requisite service period.

In addition to the time vested RSUs, in 2025 the Company entered into an Executive Performance RSU Award Agreement (the “Agreement”) with certain officers, including its President and Chief Executive Officer, Chief Financial Officer and Senior Vice President, Sales (each a “Participating Executive”) pursuant to which each Participating Executive will have the opportunity to earn a specified amount of restricted stock units (RSUs) based on Fuel Tech’s performance in 2026. The target amount of RSUs for each of four possible RSU award components is set for each Participating Executive for 2026. The amount of actual RSU awards to be issued is contingent on performance by the Participating Executive and the Company in the performance areas and for the measurement periods set forth in the Agreement as determined by the Company.

The Agreement provides for four possible RSU awards: “Look-Back RSUs,” “Total Revenue RSUs,” “New Business Revenue RSUs,” and “Operating Income” RSUs. If the Look-Back RSU’s are awarded, these RSUs will follow a vesting schedule that provides for vesting of one-third of the granted Look-Back RSUs after the first anniversary of the grant determination date, one-third after the second anniversary date and one-third after the third anniversary date. If the Total Revenue RSUs, New Business Revenue RSUs, or Operating Income RSUs targets are achieved, these RSU’s will follow a vesting schedule whereby 100% of the granted RSUs will vest one year following the grant determination date. All RSUs are valued at the date of grant based on the closing price of the Company’s common stock on the grant date.

At March 31, 2026, there is \$608 of unrecognized compensation cost related to all non-vested share-based compensation arrangements granted under the Incentive Plan. That cost is expected to be recognized over the remaining requisite service period of 1.62 years.

A summary of restricted stock unit activity for the three months ended March 31, 2026 is as follows:

	Shares	Weighted Average Grant Date Fair Value
Unvested restricted stock units at January 1, 2026	1,109,222	\$ 1.06
Granted	70,850	1.26
Vested	(108,949)	1.15
Forfeited	(425,100)	1.02
Unvested restricted stock units at March 31, 2026	646,023	\$ 1.10

The fair value of restricted stock that vested during the three-month period ended March 31, 2026 was \$125.

### Deferred Directors Fees

In addition to the Incentive Plans, Fuel Tech has a Deferred Compensation Plan for Directors (Deferred Plan). Under the terms of the Deferred Plan, Directors can elect to defer Directors’ fees for shares of Fuel Tech Common Stock that are issuable at a future date as defined in the agreement. In accordance with Accounting Standards Codification (ASC) 718, Fuel Tech accounts for these awards as equity awards as opposed to liability awards. During the three-month periods ended March 31, 2026 and 2025, Fuel Tech recorded no stock-based compensation expense under the Deferred Plan.

## 9. Warrants

The following table summarizes information about warrants outstanding and exercisable at March 31, 2026:

Exercise Price	Number Outstanding/Exercisable	Weighted Average Remaining Life in Years	Weighted Average Exercise Price
\$5.10	2,500,000	0.37	\$ 5.10
\$6.45	350,000	0.37	\$ 6.45
	2,850,000		

## 10. Debt Financing

The Company's Investment Collateral Security Agreement with BMO Harris is used for the sole purpose of issuing standby letters of credit and requires us to pledge our investments as collateral for 150% of the aggregate face amount of outstanding standby letters of credit. The Company pays 250 basis points on the face values of outstanding letters of credit. There are no financial covenants set forth in the Investment Collateral Security agreement. At March 31, 2026, the Company had outstanding standby letters of credit totaling approximately \$1,866 under the Investment Collateral Security agreement. At March 31, 2026, the investments held as collateral totaled \$2,798. Fuel Tech is committed to reimbursing the issuing bank for any payments made by the bank under these instruments.

## 11. Business Segment and Geographic Financial Data

### Business Segment Financial Data

We segregate our financial results into two reportable segments representing two broad technology segments as follows:

- The Air Pollution Control technology segment includes technologies to reduce NOx emissions in flue gas generated by the firing of natural gas or coal from boilers, incinerators, furnaces, and other stationary combustion sources. These include Over-Fire Air systems, NOxOUT® and HERT™ Selective Non-Catalytic Reduction systems, and Selective Catalytic Reduction (SCR) systems. Our SCR systems can also include Ammonia Injection Grid, and Graduated Straightening Grid GSG™ systems to provide high NOx reductions at significantly lower capital and operating costs than conventional SCR systems. ULTRA® technology creates ammonia at a plant site using safe urea for use with any SCR application. Electrostatic Precipitator (ESP) technologies make use of electrostatic precipitator products and services to reduce particulate matter. Flue Gas Conditioning systems are chemical injection systems offered in markets outside the U.S. and Canada to enhance electrostatic precipitator and fabric filter performance in controlling particulate emissions.
- The FUEL CHEM® technology segment, which uses chemical processes in combination with advanced Computational Fluid Dynamics and Chemical Kinetics Modeling boiler modeling, for the control of slagging, fouling, corrosion, opacity and other sulfur trioxide-related issues in furnaces and boilers through the addition of chemicals into the furnace using TIFI® Targeted In-Furnace Injection™ technology.

The "Other" classification includes those profit and loss items not allocated to either reportable segment. There are no inter-segment sales that require elimination.

Our Chief Executive Officer (CEO) serves as our Chief Operating Decision Maker (CODM) and is responsible for reviewing segment performance and making decisions regarding resource allocation. We evaluate performance and allocate resources based on reviewing gross margin by reportable segment. We do not allocate selling, general and administrative expenses, interest, other non-operating income or expense items, or taxes to segments. The accounting policies of the reportable segments are the same as those described in the summary of significant accounting policies (Note 1 in our annual report on Form 10-K). We do not review assets by reportable segment, but rather, in aggregate for the Company as a whole.

Information about reporting segment net sales and gross margin from continuing operations is provided below:

	Air Pollution Control Segment	FUEL CHEM Segment	Other	Total
Three months ended March 31, 2026				
Revenues from external customers	\$ 1,604	\$ 4,476	\$ —	\$ 6,080
Cost of sales	(989)	(2,447)	—	(3,436)
Gross margin	615	2,029	—	2,644
Selling, general and administrative	—	—	(3,716)	(3,716)
Research and development	—	—	(524)	(524)
Income (loss) from operations	\$ 615	\$ 2,029	\$ (4,240)	\$ (1,596)
Three months ended March 31, 2025				
Revenues from external customers	\$ 1,303	\$ 5,079	\$ —	\$ 6,382
Cost of sales	(878)	(2,545)	—	(3,423)
Gross margin	425	2,534	—	2,959
Selling, general and administrative	—	—	(3,341)	(3,341)
Research and development	—	—	(570)	(570)
Income (loss) from operations	\$ 425	\$ 2,534	\$ (3,911)	\$ (952)

**Geographic Segment Financial Data**

Information concerning our operations by geographic area is provided below. Revenues are attributed to countries based on the location of the end-user. Assets are those directly associated with operations of the geographic area.

	Three Months Ended	
	March 31,	
	2026	2025
<b>Revenues:</b>		
United States	\$ 5,247	\$ 5,359
Foreign	833	1,023
	<u>\$ 6,080</u>	<u>\$ 6,382</u>
	March 31,	December 31,
	2026	2025
<b>Assets:</b>		
United States	\$ 41,751	\$ 44,345
Foreign	2,736	2,834
	<u>\$ 44,487</u>	<u>\$ 47,179</u>

**12. Accrued Liabilities**

The components of other accrued liabilities are as follows:

	As of	
	March 31, 2026	December 31, 2025
Contract liabilities (Note 3)	\$ 1,066	\$ 1,026
Warranty reserve (Note 13)	159	159
Deferred revenue	72	91
Accrued professional fees	—	83
Other accrued liabilities	190	275
Total other accrued liabilities	<u>\$ 1,487</u>	<u>\$ 1,634</u>

**13. Commitments and Contingencies**

Fuel Tech is subject to various claims and contingencies related to, among other things, workers compensation, general liability (including product liability), and lawsuits. The Company records liabilities where a contingent loss is probable and can be reasonably estimated. If the reasonable estimate of a probable loss is a range, the Company records the most probable estimate of the loss or the minimum amount when no amount within the range is a better estimate than any other amount. The Company discloses a contingent liability even if the liability is not probable or the amount is not estimable, or both, if there is a reasonable possibility that a material loss may have been incurred.

From time to time we are involved in litigation with respect to matters arising from the ordinary conduct of our business. In the opinion of management, based upon presently available information, either adequate provision for anticipated costs have been accrued or the ultimate anticipated costs will not materially affect our consolidated financial position, results of operations, or cash flows. We do not believe we have any pending loss contingencies that are probable or reasonably possible of having a material impact on our consolidated financial position, results of operations or cash flows.

Fuel Tech issues a standard product warranty with the sale of its products to customers. Our recognition of warranty liability is based primarily on analyses of warranty claims experienced in the preceding years as the nature of our historical product sales for which we offer a warranty are substantially unchanged. This approach provides an aggregate warranty accrual that is historically aligned with actual warranty claims experienced.

There was no change in the warranty liability balance included in the other accrued liabilities line of the Condensed Consolidated Balance Sheets during the three months ended March 31, 2026 and 2025. The warranty liability balance was \$159 at March 31, 2026 and December 31, 2025.

#### **14. Income Taxes**

The Company's effective tax rate is approximately (0.1%) and 0.0% for the three-month periods ended March 31, 2026 and 2025, respectively. The Company's effective tax rate differs from the statutory federal tax rate of 21% for the three-month periods ended March 31, 2026 and 2025 primarily due to a full valuation allowance recorded on our United States, China and Italy deferred tax assets since we cannot anticipate when or if we will have sufficient taxable income to utilize the deferred tax assets in the future. Further, our effective tax rate differs from the statutory federal tax rate due to state taxes, differences between U.S. and foreign tax rates, foreign losses incurred with no related tax benefit, non-deductible commissions, and non-deductible meals and entertainment expenses for the three-month periods ended March 31, 2026 and 2025.

**FUEL TECH, INC.**

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

**Overview**

In the first quarter of 2026, the Company continued to execute on existing APC segment projects while actively pursuing new contract awards. FUEL CHEM segment revenue was negatively impacted due to seasonal maintenance outages and dispatch related decreases in operational demand. We continue to invest in development of new technologies to expand our product offerings into the water and waste-water treatment market. Our capital resources are sufficient for our immediate and longer-term needs, and we continue to enjoy the services and support of a dedicated workforce. We expect that our cost control efforts will maintain our existing levels of operating expenditures and that new business opportunities will lead to an improved financial and market outlook.

**Key Operating Factors**

Our FUEL CHEM segment experienced a decrease in revenue and segment operating profits in the current quarter as compared to 2025. The FUEL CHEM segment was impacted by weather and seasonal maintenance outages at customer plants as well as dispatch related decreases in operational demand.

Our APC business experienced an increase in revenue and segment operating profit in the current quarter as compared to 2025, primarily due to timing of project execution as well as an increase in ancillary revenue. We are encouraged by the depth of our business development activities, which reflects an increased focus on global emissions protocols across a variety of fuel sources. Our Consolidated APC backlog at March 31, 2026 was \$6,923 and our global sales pipeline is in the \$75 -100 million range.

**Results of Operations**

**Revenues**

Revenues for the three-month periods ending March 31, 2026 and 2025 were \$6,080 and \$6,382, respectively, representing a decrease of \$302, or 5%, versus the same period last year.

The APC technology segment generated revenues of \$1,604 for the three-month period ended March 31, 2026, representing an increase of \$301, or 23%, from the prior year amount of \$1,303. This increase in APC revenue was primarily related to timing of project execution on existing contracts. Consolidated APC backlog at March 31, 2026 was \$6,923 versus backlog at December 31, 2025 of \$7,047. Our current backlog consists of U.S. domestic delivered projects totaling \$3,657 and international delivered projects totaling \$3,266.

The FUEL CHEM technology segment generated revenues of \$4,476 and \$5,079 for the three-month periods ended March 31, 2026 and 2025, respectively, representing a decrease of \$603, or 12%, versus the same period last year. This decrease in FUEL CHEM revenue for the three months ended March 31, 2026 as compared to the same period in the prior year was primarily due to seasonal maintenance outages and dispatch related decreases in operational demand.

**Cost of sales and gross margin**

Consolidated gross margin percentage for the three-month periods ended March 31, 2026 and 2025 was 43% and 46%, respectively. For the three-month periods ended March 31, 2026 and 2025 the FUEL CHEM operating segment gross margin was 45% and 50%, respectively. FUEL CHEM gross margin decreased from the prior year primarily due to a decreased volume of sales activity combined with relatively flat operational expenses. APC segment gross margin increased to 38% from 33% primarily due to product and project mix.

**Selling, general and administrative**

Selling, general and administrative expenses (SG&A) were \$3,716 and \$3,341 for the three-month periods ended March 31, 2026 and 2025, respectively. For the three-month period ended March 31, 2026, the increase of \$375 is primarily the result of an increase in employee-related expenses of \$195, an increase in professional fees of \$109, and an increase in administrative expenses for domestic and international locations of \$74. For the three-month periods ending March 31, 2026 and 2025, SG&A as a percentage of revenues increased to 61% from 52%. The increase versus the comparable period is primarily due to the decrease in revenues and increase in SG&A compared to prior quarter.

## **Research and development**

Research and development expenses were \$524 and \$570 for the three-month periods ended March 31, 2026 and 2025, respectively. The expenditures in our research and development expenses are focused on new product development efforts in the pursuit of commercial applications for technologies outside of our traditional markets, and in the development and analysis of new technologies that could represent incremental market opportunities. This includes water treatment technologies and more specifically, our DGI® Dissolved Gas Infusion Systems, an innovative alternative to current aeration technology. This infusion process has a variety of applications in the water and wastewater industries, including remediation, treatment, biological activity, and wastewater odor management. DGI® technology benefits include reduced energy consumption, installation costs, and operating costs, while improving treatment performance.

## **Interest income**

Interest income was \$240 for the three-month period ended March 31, 2026 compared to \$279 for the same period in 2025. Interest income primarily relates to interest received on the held-to-maturity debt securities and money market funds.

## **Other income (expense), net**

Other expense, net was \$0 for the three-month period ended March 31, 2026 compared to Other expense, net of \$66 for the same period in 2025. Other expense for the three-month period ended March 31, 2025 was mainly due to transactional foreign exchange gains and losses recognized from repayment of intercompany balances.

## ***Liquidity and Sources of Capital***

We have losses from operations during the three-month period ended March 31, 2026 totaling \$1,596. Our cash used in operations for this same period totaled \$847.

Our cash and cash equivalent balance as of March 31, 2026 totaled \$9,109, which includes \$1,320 of cash equivalents, and our working capital totaled \$22,166. We have no outstanding debt other than our outstanding letters of credit, under our Investment Collateral Security agreement with BMO Harris Bank, N.A. (the Investment Collateral Security agreement), which does not have any financial covenants. We expect to continue operating under this arrangement for the foreseeable future.

Operating activities used cash of \$847 for the three-month period ended March 31, 2026, primarily due to a decrease in accounts payable of \$1,095 and a decrease in accrued liabilities and other non-current liabilities of \$183, offset by a decrease in accounts receivable of \$1,176.

Operating activities provided cash of \$1,508 for the three-month period ended March 31, 2025, primarily due to a decrease in accounts receivable of \$3,768 and removals of non-cash items from our net loss from continuing operations of depreciation and amortization of \$173 and stock-based compensation, net of forfeitures of \$110, offset by a decrease in accounts payable of \$1,340, a decrease in accrued liabilities and other non-current liabilities of \$249, an increase in inventory of \$137, an increase in prepaid expenses, other current assets and other non-current assets of \$28, and removals of non-cash items from our net loss from continuing operations of interest income on held-to-maturity securities of \$50.

Investing activities used cash of \$1,914 and provided cash of \$1,692 for the three-month periods ended March 31, 2026 and 2025, respectively. Investing activities for the three-month periods ended March 31, 2026 and 2025 primarily consisted of purchases of debt securities as investments of \$6,092 and \$993, respectively. Investing activities for the three-month periods ended March 31, 2026 and 2025 were funded by the maturities of debt securities of \$4,500 and \$2,750, respectively.

Financing activities used cash of \$34 and \$24, respectively, for the three months ended March 31, 2026 and 2025 due to taxes paid on behalf of the equity award participants on the vesting of restricted stock units.

We continue to monitor our liquidity needs and in response to our recent periods of declines in revenue and net losses have taken measures to reduce expenses and restructure operations which we feel are necessary to ensure we maintain sufficient working capital and liquidity to operate the business and invest in our future. We have evaluated our ongoing business needs and considered the cash requirements of our base business of Air Pollution Control and FUEL CHEM. This evaluation included consideration of the following: a) customer and revenue trends in our APC and FUEL CHEM business segments, b) current operating structure and expenditure levels, and c) other research and development initiatives. Based on this analysis, management believes that currently we have sufficient cash and working capital to operate our base APC and FUEL CHEM businesses. We believe our current cash position and net cash flows expected to be generated from operations are adequate to fund planned operations of the Company for the next 12 months.

## [Table of Contents](#)

We expect additional capital expenditures in 2026 for the DGI business, maintenance of field equipment, computer and systems, and general office equipment. We expect to fund our capital expenditures with cash from operations or cash on hand.

The Company's investment policy provides for \$20,000 in funds at BMO Harris Bank, N.A. (BMO Harris) to be invested in held-to-maturity debt securities of United States (US) Treasuries, including Notes, Bonds, and Bills, or US Government Agency securities. The funds are held in money market funds until they are invested in those securities. The investments are structured to create a maturity "ladder" where the proceeds from maturities are re-invested to maintain a balance of short- and long-term investments based on expected business needs. Maturities are between three and thirty-six months. This strategy allows the Company to provide returns on excess cash, while managing liquidity and minimizing exposure to interest rate fluctuations.

The Company's Investment Collateral Security agreement is used for the sole purpose of issuing standby letters of credit and requires us to pledge our investments as collateral for 150% of the aggregate face amount of outstanding standby letters of credit. The Company pays 250 basis points on the face values of outstanding letters of credit. There are no financial covenants set forth in the Investment Collateral Security agreement. At March 31, 2026, the Company had outstanding standby letters of credit totaling approximately \$1,866 under the Investment Collateral Security agreement. At March 31, 2026, the investments held as collateral totaled \$2,798. Fuel Tech is committed to reimbursing the issuing bank for any payments made by the bank under these instruments.

### ***Contingencies and Contractual Obligations***

Fuel Tech issues a standard product warranty with the sale of its products to customers as discussed in Note 13. There was no change in the warranty liability balance during the three months ended March 31, 2026.

### ***Forward-Looking Statements***

This Quarterly Report on Form 10-Q contains "forward-looking statements," as defined in Section 21E of the Securities Exchange Act of 1934, as amended, which are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995 and reflect Fuel Tech's current expectations regarding future growth, results of operations, cash flows, performance and business prospects, and opportunities, as well as assumptions made by, and information currently available to, our management. Fuel Tech has tried to identify forward-looking statements by using words such as "anticipate," "believe," "plan," "expect," "estimate," "intend," "will," and similar expressions, but these words are not the exclusive means of identifying forward-looking statements. These statements are based on information currently available to Fuel Tech and are subject to various risks, uncertainties, and other factors, including, but not limited to, those discussed in Fuel Tech's Annual Report on Form 10-K for the year ended December 31, 2025 in Item 1A under the caption "Risk Factors," which could cause Fuel Tech's actual growth, results of operations, financial condition, cash flows, performance and business prospects and opportunities to differ materially from those expressed in, or implied by, these statements. Fuel Tech undertakes no obligation to update such factors or to publicly announce the results of any of the forward-looking statements contained herein to reflect future events, developments, or changed circumstances or for any other reason. Investors are cautioned that all forward-looking statements involve risks and uncertainties, including those detailed in Fuel Tech's filings with the Securities and Exchange Commission.

#### **Item 3. Quantitative and Qualitative Disclosures about Market Risk**

Fuel Tech's earnings and cash flow are subject to fluctuations due to changes in foreign currency exchange rates. We do not enter into foreign currency forward contracts nor into foreign currency option contracts to manage this risk due to the immaterial nature of the transactions involved.

#### **Item 4. Controls and Procedures**

### ***Evaluation of Disclosure Controls and Procedures***

Fuel Tech maintains disclosure controls and procedures and internal controls designed to ensure (a) that information required to be disclosed in Fuel Tech's filings under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and (b) that such information is accumulated and communicated to management, including the principal executive and financial officer, as appropriate to allow timely decisions regarding required disclosure. Fuel Tech's Chief Executive Officer and principal financial officer have evaluated the Company's disclosure controls and procedures, as defined in Rules 13a - 15(e) and 15d -15(e) of the Exchange Act, as of the end of the period covered by this report, and they have concluded that these controls and procedures are effective.

### ***Changes in Internal Control over Financial Reporting***

There has been no change in the Company's internal control over financial reporting during the quarter covered by this report that has materially affected, or is reasonably likely to materially affect, its internal control over financial reporting.

## **PART II. OTHER INFORMATION**

### Item 1. Legal Proceedings

We are from time to time involved in litigation incidental to our business. We are not currently involved in any litigation in which we believe an adverse outcome would have a material effect on our business, financial conditions, results of operations, or prospects.

### Item 1A. Risk Factors

The risk factors included in our Annual Report on Form 10-K for fiscal year ended December 31, 2025 have not materially changed.

### Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None

### Item 5. Other Information.

#### *Rule 10b5-1 Trading Arrangements*

During the three months ended August 31, 2025, none of the directors or executive officers of the Company adopted or terminated any contracts, instructions, or written plans for the purchase or sale of the Company's securities that were intended to meet the affirmative defense conditions of Rule 10b5-1(c) or any other "non-Rule 10b5-1 trading arrangement."

### Item 6. Exhibits

#### a. Exhibits (all filed herewith)

- 31.1 [Certification of CEO pursuant to Section 302 of Sarbanes-Oxley Act of 2002](#)
- 31.2 [Certification of principal financial officer pursuant to Section 302 of Sarbanes-Oxley Act of 2002](#)

I, Vincent J. Arnone, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Fuel Tech, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15 (e) and 15d-15 (e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent functions):
  - a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
